

HONDA S2000 AP1/AP2 F20C/F22C

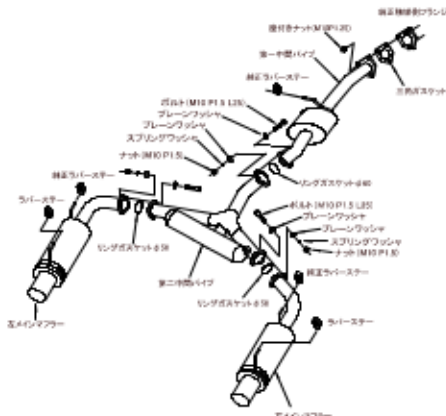

Code No. 32016-AH028

「Lightweight」

The weight of this SPEC-L is only 10kg which is only 60% of the 25kg stock muffler. This lightweight exhaust system becomes one of important factors of agile driving. SUS304 0.8mm thick pipes and 0.5 thick silencers are utilized, which is the first in the industry.

"Standard Bullet-shape" for aggressive appearance

Bullet-shaped silencer presents an aggressive appearance; but the silent chamber creates the exhaust sound matched for daily driving. The carbon tip accentuates the high performance and lightweight concept of this muffler.

Model (Engine)	GH/LA/ABA-AP1(F20C)	
	ABA-AP2 (F22C)	
Model Year	99/4~05/10(AP1) 05/11~09/9(AP2)	
JASMA Number	03S16563	
Main Material	SUS304	
Tip O.D.	φ94	
Main Pipe Dia.	φ60→φ50×2	
Closed Noise Left/Right	Stock	90dB (@Idling: 60dB)
(Noise Level @ Idling)	HKS(AP1)	94dB (@Idling: 66dB)
Ground Clearance	135mm(Y-shaped pipe)	
EX Pipe Ground Clearance (Partial)	135mm(Y-shaped pipe)	
Remarks	AP2: 94dB (@Idling: 65dB)
